

PRODUCT CHANGE NOTIFICATION

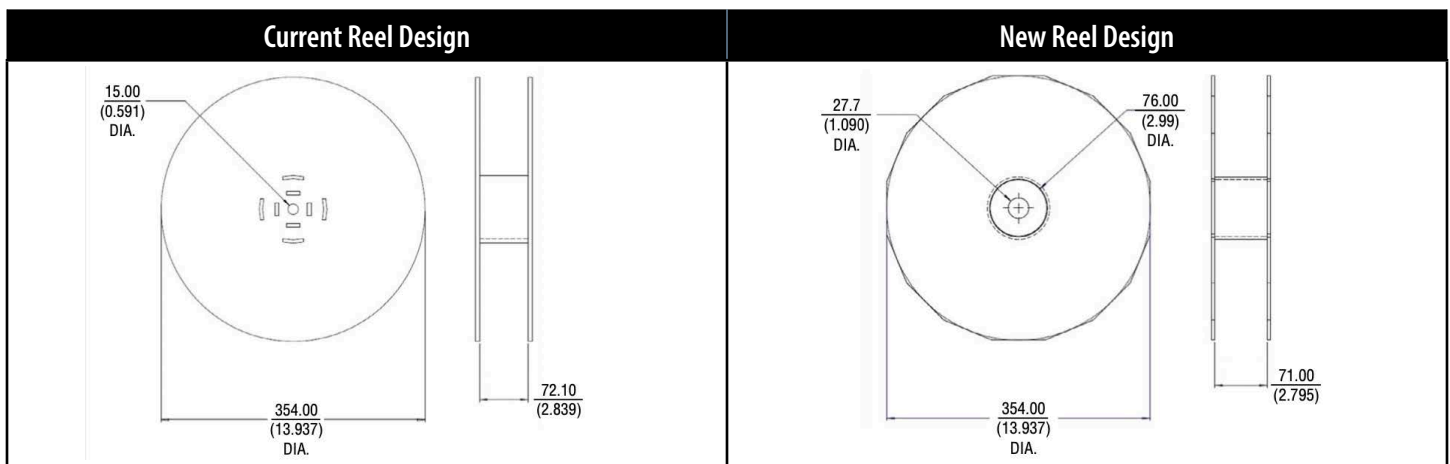

GAS DISCHARGE TUBES

Bourns® Model 2035, 2037, 2027 & 2039 Gas Discharge Tubes Series

Changes to Reel Hub Packaging

Riverside, California – March 22, 2023 – The reel packaging for select Axial Leaded Bourns® Model [2035](#), [2037](#), [2027](#) and [2039](#) Series Gas Discharge Tubes is being improved. The reels used to pack these gas discharge tubes in their axial leaded tape & reel packing configuration will have the reel changed to use a plastic or metallic (optional) hub. This change will minimize the friction between the support shaft and the reel in automatic lines, decreasing the tension in the tape and thereby optimizing performance.

Users should verify that the described changes will not impact the performance of the product in their specific applications.

GDT2303

The change in the reel's hub will have no effect on the form, fit, function, quality, or reliability of the products themselves. A list of affected part numbers is provided below.
