Users should verify that the described changes will not impact the performance of the product in their specific applications.

IC24005

As shown in the image above, the form of the affected part numbers will change slightly due to the marking change. The fit, function, quality and reliability of the affected inductors will not change. Traceability will be maintained through lot code and date code.

Samples built with the above change are available on request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

- Date that manufacturing of existing inductors will cease: **March 4, 2024**
- Date that deliveries of modified inductors will begin: **March 5, 2024**
- First date code using the above changes: **2410**

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).
