The new additional manufacturing site in China uses the same design, material, and manufacturing process as the existing site. The power inductors produced at the new additional manufacturing site will meet the same data sheet specifications as the inductors from the existing site.

The form, fit, function, quality, reliability, production lead time and country of origin of the inductors from the new manufacturing site will be the same as those of the existing site. Traceability will be maintained through lot code and date code.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured at both manufacturing sites will begin: **December 1, 2023**

First date code using the above changes: **2348**

Orders for the affected part numbers received after December 1, 2023 may be filled interchangeably from the existing manufacturing site or the new additional manufacturing site.
