

# PRODUCT CHANGE NOTIFICATION

## MAGNETICS

## Bourns® Model SRU5028 Series Shielded Power Inductors *Process and Supplier Changes*

Riverside, California - February 6, 2024 – In the spirit of continuous improvement, effective May 30, 2024, Bourns will change the marking, testing, and taping process from a manual to an integrated automated process for the [Model SRU5028 Series Shielded Power Inductors](#). Additionally, the marking process will change from screen printing to inkjet printing, and the ink supplier will also change. These changes should improve production efficiency, product quality and reliability. The new supplier has been qualified and is included in the Bourns Authorized Vendor List. A list of affected part numbers is included below.

Affected Part Numbers			
SRU5028-1R2Y	SRU5028-4R7Y	SRU5028-150Y	SRU5028-470Y
SRU5028-2R2Y	SRU5028-6R8Y	SRU5028-220Y	SRU5028-680Y
SRU5028-3R3Y	SRU5028-100Y	SRU5028-330Y	SRU5028-101Y

As shown in the images above, the form will change slightly due to the change to inkjet printing marking. The fit and function of the affected part numbers will remain the same. Traceability will be maintained through lot code and date code.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

### Implementation dates are as follows:

Date that products manufactured with the existing process and supplier will cease: **May 29, 2024**

Date that deliveries of products manufactured with the process and supplier changes will begin: **May 30, 2024**

First date code using the above changes: **2422**

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

*Users should verify that the described changes will not impact the performance of the product in their specific applications.*
