End of Life for Model EN Optical Encoder with Index Channel

Bourns® Sensors & Controls Product Line is announcing the end of life for [Model EN Series](#) optical encoders of the index channel version. The ASIC supplier is stopping production of the component required to produce this feature.

Current active part numbers are listed below for reference:

ENA2J-B28-L00064

ENC2J-D16-R00100L

ENA2J-B28-L00064L

ENS2J-B28-L00128

ENA2J-B28-L00100L

ENS2J-B28-L00128L

Last time buy orders will be accepted until April 1, 2012. Schedules will be as produced.

Possible Replacement:

Bourns does offer a non-contacting product line incorporating an index channel that may be considered in place of the EN series. Please see the EMS 22 data sheet at the following link: <http://www.bourns.com/data/global/pdfs/EMS22Q.pdf>.

Customers should carefully review the data sheet for compatibility with their application.

Should you have any questions or need additional information, please feel free to contact [Customer Service/Inside Sales](#).
