ISDN

Objective
Integrated Services Digital Network (ISDN) simultaneously transmits voice, video, and data over public switched telephone network circuits. This solution protects ISDN circuit interfaces against surge and power contact threats.

Solution
4 Thyristors: TISP4145M3BJR-S
4 Multifuse® PTCs: MF-RX018/250

Compliance
ITU-T K.21

Alternate Recommendations
For GR-1089-CORE designs, the TISP4145H3 and B1250T are recommended.

Benefit
This solution provides a high level of protection within a small amount of PCB area.

The schematic above illustrates the application protection and does not constitute the complete circuit design. Customers should verify actual device performance in their specific applications.

Solution Products
- TISP4145M3BJR-S
- MF-RX018/250

Design Kit
PN-DESIGNKIT 10

Bourns® PortNote® solutions provide protection recommendations for typical port threats.
