SENSORS & CONTROLS

Bourns Introduces New Analog Environmental Sensors

BPS160 Series

Riverside, California – March 27, 2025 – Bourns Sensors & Controls Product Line is introducing a new series of environmental sensors for use in applications with ultra-low pressure sensing requirements. The [Model BPS160](#) line has been designed to provide high sensitivity/accuracy, long-term reliability, high temperature capability and harsh media compatibility with amplified analog output.

Bourns' new sensors feature state-of-the-art technologies that provide them the ability to operate in conditions that would typically cause many sensors to fail.

The Model BPS160 pressure sensor line features certain harsh media compatibility and high temperature operation with high accuracy. This sensor family offers particularly stable performance over the product's lifespan and the ability to operate within a wide range of pressures.

Samples and production quantities are now available. For your convenience, the [data sheet](#) and [material declaration sheet](#) are now available at [bourns.com](https://www.bourns.com).

Should you have any questions or need additional information, please contact [Customer Service/Inside Sales](#).

Features

- SMD terminal
- Harsh media monitoring
- -20 °C to +100 °C operating temperature range
- Gauge pressure
- Improved linearity
- Dual horizontal port
- RoHS compliant*

Applications

- Medical equipment (low/medium risk)**
- White goods
- Industrial P/I
- Process control
