

BOURNS®

Dennis C. Lause
Senior Vice President, Worldwide Sales

November 9, 2012

Subject: Rare Earth Minerals Status

To whom it may concern:

In an effort to provide continuing communication regarding the continuity of supplies used in Bourns, Inc.'s ("Bourns") products, Bourns is pleased to provide the following information pertaining to China's announcement of its plans to cut production of Rare Earth Elements ("REE") in the future.

REEs referred to herein are:

Cerium	Lanthanum	Scandium
Dysprosium	Lutetium	Terbium
Erbium	Neodymium	Thulium
Europium	Praseodymium	Ytterbium
Gadolinium	Promethium	Yttrium
Holmium	Samarium	

Bourns has researched its supply chain and is pleased to advise that currently Bourns is not adversely affected by China's announcement. Further, Bourns does not anticipate any adverse effect to its future sources of supply or shipments to its customers because of China's announcement.

In the unlikely event that any shipments of Bourns® products to you will be affected by China's announcement, you will be contacted promptly by Bourns.

Best Regards,
BOURNS, INC.
