**CD143A-SR05LC - Steering/TVS Diode Array Series**

### General Information

The Bourns® Model CD143A-SR05LC device provides ESD, EFT and surge protection for the external ports of portable electronic devices such as cellphones, handheld electronics and personal computers.

The ESD protection provided by the component enables a data port to withstand a minimum ±8 KV Contact / ±15 KV Air Discharge per the ESD test method specified in IEC 61000-4-2. The device measures 2.80 mm x 1.20 mm and is available in a SOT-143 package intended to be mounted directly onto an FR4 printed circuit board. The Bourns® device will meet IEC 61000-4-2 (ESD), IEC 61000-4-4 (EFT) and IEC 61000-4-5 (Surge) requirements.

Notes:
1. From Pin 4 to Pin 1.
2. See Pulse Wave Form.
3. Pin 1 (GND) connected to Ground, Pin 4 (REF) connected to 5 V.
4. I/O to GND, REF connected to 5 V and GND connected to Ground.

---

** Bourns considers a product to be “halogen free” if (a) the Bromine (Br) content is 900 ppm or less; (b) the Chlorine (Cl) content is 900 ppm or less; and (c) the total Bromine (Br) and Chlorine (Cl) content is 1500 ppm or less.

The device characteristics and parameters in this data sheet can and do vary in different applications and actual device performance may vary over time. Users should verify actual device performance in their specific applications.
CD143A-SR05LC - Steering/TVS Diode Array Series

**Product Dimensions**

This is a molded JEDEC SOT-143 device. It has a flammability rating of UL 94V-0. The dimensions for the packaged device are shown below.

**Recommended Pad Layout**

This is the footprint recommended for this SOT-143 device.

**Block Diagram**

The device block diagram below includes the pin names and basic electrical connections associated with each channel.

**Typical Part Marking**

CD143A-SR05LC..............................................................5LC

Specifications are subject to change without notice. The device characteristics and parameters in this data sheet can and do vary in different applications and actual device performance may vary over time. Users should verify actual device performance in their specific applications.

Application Information

The Model CD143A-SR05LC is designed to protect two data lines against transient overvoltage events, as well as to limit the transient voltage on the 5 V supply line of the protected device.

Pin 1 must be connected to the local Ground used by the protected device and Pin 4 must be connected to the 5 V supply rail used by the protected device, as shown in the figure below. Under no circumstances should Pins 1 and 4 be left unconnected (floating).

To optimize the performance of the protection design, connections to the CD143A-SR05LC should be as short as possible. This will minimize the parasitic inductance of the printed circuit board traces. An optional 0.1 µF bypass chip capacitor can be added from Pin 4 to Ground to enhance the ESD performance of the design when the nearest bypass capacitor is a significant distance from the Model CD143A-SR05LC.

Specifications are subject to change without notice. The device characteristics and parameters in this data sheet can and do vary in different applications and actual device performance may vary over time. Users should verify actual device performance in their specific applications.
**CD143A-SR05LC - Steering/TVS Diode Array Series**

**Packaging Information**

The surface mount product is packaged in an 8 mm x 4 mm tape and reel format per EIA-481 standard.

---

**Item** | **Symbol** | **SOT-143**
---|---|---
Carrier Width | A | 2.80 ± 0.15 (0.110 ± 0.006)
Carrier Length | B | 3.25 ± 0.15 (0.128 ± 0.006)
Carrier Depth | C | 1.25 ± 0.15 (0.049 ± 0.006)
Sprocket Hole | d | 1.50 ± 0.10 (0.059 ± 0.004)
Reel Outside Diameter | D | 178 ± 2 (7.008 ± 0.079)
Reel Inner Diameter | D1 | 50.0 MIN.
Feed Hole Diameter | D2 | 13.0 ± 0.20 (0.512 ± 0.008)
