SENSORS & CONTROLS

Bourns Announces the Expansion of the Riedon™ SSD-1000A Series Digital Current Sensor by Bourns AEC-Q Compliant Components Assembly Option

Riverside, California - January 8, 2025 - In line with our commitment to provide products with innovative designs, superior quality and exceptional value, Bourns Sensors and Controls announces the expansion of the Riedon™ SSD-1000A Series Digital Current Sensor by Bourns. This new extension offers the option to be assembled with AEC-Q200 compliant components.

The SSD-1000A Series includes innovatively designed digital DC shunt based current sensors that offer superior accuracy, stability, and electrical isolation in certain harsh industrial environments.

This new product series is well suited for a wide variety of battery related current sensing applications including large scale energy storage banks, renewable energy generation infrastructure, industrial motor drives, building automation systems and EV charging stations.

Features

- Formerly a Riedon™ product
- 24-bit isolated shunt current sensor with CANbus or RS-485/MODBUS interface
- 100 A (2 kA peak), 250 A (5 kA peak), 500 A (10 kA peak) or 1000 A (20 kA peak)
- 1500 VDC reinforced galvanic isolation
- 16-bit +150 °C microcontroller
- 24-bit ADC with buffered analog inputs
- ECC flash memory with autocorrect single bit errors
- Internal and external CRC data error detection
- Advanced non-linear temperature compensation
- Assembled using AEC-Q compliant components (optional for Model SSD-1000A only)
- RoHS compliant*

Applications

- EV charging stations
- Battery systems
- Renewable energy
- Motor drives

For programming information, please visit the interactive interface section within the [SSD-CANbus](#) and [SSD-RS485](#) data sheets.

Visit the Bourns website at <https://www.bourns.com> for additional details. If you have any questions, please contact [Bourns Customer Service/Inside Sales](#).
