

### **Features**

- Lightweight, handheld design
- Easy-to-read LCD display
- Simple operation
- High accuracy peak reading circuit
- Wide 10-1000 V test range
- Precise auto-sensing shutoff

# 4010-01 - Surge Protector Test Set

### Description

Bourns® 4010-01 Surge Protector Test Set is a handheld, battery-operated tester designed to measure the clamping voltage and dc breakdown voltage of most surge protective devices. The 4010-01 is suitable for testing gas tubes, carbon gaps, MOVs, Zener and avalanche diodes and thyristor devices, both as components and as complete protectors.

The 4010-01 is a true slow-rise tester because it does not use a pulse transformer. It contains unique test circuitry and a precise 1 mA detector. As soon as 1 mA is conducted through clamping type devices, such as MOVs and avalanche diodes, the control circuits removes the test voltage from the output terminals and displays the clamping voltage on the meter. A low energy capacitive circuit will discharge through crowbar type protectors, such as gas tubes and carbon blocks, and trigger the detector. The breakdown voltage will be displayed and the test voltage removed.

#### Operation

Internal switches for ramp speed and discharge circuit type are accessed by removing the back cover. They are to be set for the intended application: 200 V/s for laboratory tests or QC type approvals; 1000 V/s for high-speed testing or sorting. The IEEE discharge circuit permits gas tubes to conduct in the arc mode, while the ITU circuit generally allows only glow currents to flow.

Pushing the test button applies a linear ramp to the device under test. Sensing circuitry automatically terminates the test when either the dc breakdown or 1 mA clamping voltage is reached. The test value is maintained on the LCD display until the test button is released.

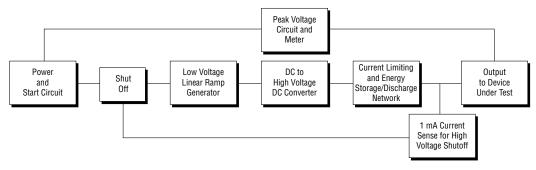

### **Specifications**

Open Circuit Voltage Rate of Rise	200 V/s or 1000 V/s
Maximum Output Voltage	1000 V
Useable Measuring Range	10-1000 V
Test Current for Clamping Devices	1 mA ±10 %
Test Current for Crowbar Devices	>1 A
Operating Temperature	0 to +50 °C
Storage Temperature	10 to +60 °C
Measurement AccuracyPower Source	0.5 %
Power Source	3 lithium batteries -
	NEMA type 5024LC
Battery Life	
200 V/s	Up to 10,000 tests
1000 V/s	Up to 50,000 tests
Shipping Weight	2 lbs.
Warranty	2 years

#### Notes:

- For P-type thyristor protectors, breakdown voltage V<sub>BO</sub> occurs at the device zener voltage V<sub>Z</sub>. Therefore, the tester will measure actual V<sub>BO</sub>.
- For N-type thyristor protectors, breakover voltage V<sub>BO</sub> is higher than the zener voltage V<sub>Z</sub>. For these devices, the tester will
  measure V<sub>Z</sub>.

# **Functional Block Diagram**

# **Applications**

Suitable for testing:

- Gas tubes
- Carbon gaps
- MOVs
- Zener and avalanche diodes
- Thyristor devices
- Finished product

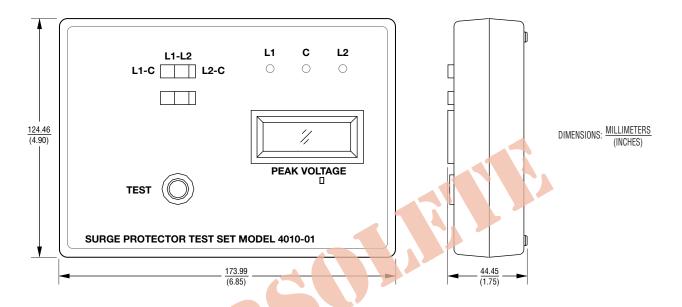

# **Additional Features**

- Selector switches for complete testing between all terminals and polarities
- Linear voltage ramp, selectable for 200 V/s or 1000 V/s operation
- Selectable IEEE or CCITT type discharge circuits
- Wide range of adapters for standard protector types

## **Product Dimensions**

### **How To Order**

Part No. Accesso	ories Included	Part No.	Available Separately
4010-01 No Acce	ssories	30503-01	Test Cable w/Alligator Clip - Red
4010-01-A Nylon Ca	arrying Case	30503-02	Test Cable w/Alligator Clip - Black
4010-01-B Nylon Ca	ase, 48-inch Leads w/Alligator Clips	4020-00-A	AC Adaptor
(Suitable	e for Testing A.C. Arresters on Site)	72288	Adapter for 2-pole Gas Tubes, Fits 6 and
4010-01-C Nylon Ca	ase, P/N 72288 and 72289 Gas Tube		8 mm High Gas Tubes and Most Carbon
Adapters	3		Block Protectors
4010-01-D Nylon Ca	ase, P/N 72291 5-Pin Module	72289	Adapter for 3-pole Gas Tubes with Leads on
Adapter			4.4, 4.7 and 6.4 mm Centers
·		72291	Adapter for Standard 300 Series 5-pin
			Protector Module

NOTE: Uses three NEMA Type 5024LC Lithium batteries.
