**708X Series – Network Interface Device**

Bourns® 708X Series NID is designed to be used as a two-line unit to eliminate the necessity of upgrading kits. The installer simply needs to add the Station Protector and connect the internal wiring when activating the second line. This model can be installed outside, as a stand-alone unit (Model 7081) or indoors with the outside cover removed (Model 7080). This NID is designed to fit a variety of existing or contractor provided flush mounted utility boxes.

The Model 708X Series two line NID is manufactured of flame retardant, high-impact resistant, UV resistant desensitized plastic.
