**EXPOSED POWER OVER ETHERNET (PoE)**

Circuit Conditioning

Bourns® PortNote® solutions provide protection recommendations for typical port threats.

### Solution Product

**SM51625EL**

---

### Objective

Introduction of a high current PoE transformer, enabling higher power applications for outdoor PoE applications.

### Solution

1 High Current Transformer SM51625EL

---

### Compliance*

IEEE 802.3

---

### Benefit

This solution enables high power delivery over Ethernet cables without impacting signal integrity.

---

*The Bourns® Model SM51625EL transformer is built to meet IEEE 802.3 specifications. By adhering to the specified limits defined in IEEE 802.3-2012, Clause 40.8.3 for Medium Dependent Interface (MDI), the device can assist with an application’s compliance to IEEE 802.3-2012.

The schematic above illustrates the application protection and does not constitute the complete circuit design. Customers should verify actual device performance in their specific applications.
