Objective

VDSL circuits are sometimes combined with Plain Old Telephone Service (POTS) circuits. This solution protects those communication ports against surge and power contact threats.

Compliance

ITU-T K.20, K.45, K.21 (Enhanced)
- 6 kV 10/700 µs Lightning Surge
- 600 Vrms Power Induction
- 230 Vrms Power Contact

GR-1089-CORE Issue 6

Alternate Recommendations

Variations of this circuit are available depending on specific design constraints; contact your local Bourns technical representative for more information.

Benefit

This solution provides protection to the voice and data circuits without impairing the VDSL signal.

The schematic above illustrates the application protection and does not constitute the complete circuit design. Customers should verify actual device performance in their specific applications.
