Riverside, California – March 22, 2023 – In order to support our fast-growing demand, enhance continuity of supply and provide maximum flexibility to customers, effective May 25, 2023, Bourns will begin using an additional ferrite core material supplier for the Model SRN4026 Semi-shielded Power Inductors. The additional supplier has been qualified and included in the Bourns Authorized Vendor List. The affected part numbers are shown below.

The use of the core from the additional supplier will not change the data sheet specifications for the Model SRN4026 Semi-shielded Power Inductors. The form, fit, function, quality, and reliability of the inductor will not be affected by the core used. Traceability will be maintained through lot code and date code.

Samples built using cores from the additional inductor core supplier are available upon request. Bourns recommends that customers test the affected part number(s) with the new core in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured using cores from both sources will begin: May 25, 2023
First date code using cores from both sources: 2321

If you have any questions or need additional information, please feel free to contact Customer Service/Inside Sales.

Users should verify that the described changes will not impact the performance of the product in their specific applications.
