The rechargeable battery industry is experiencing significant growth which is projected to continue to expand into the future. This growth is driven by an increase in portable battery powered devices, electric vehicles, energy storage and industrial applications.

These applications use various battery chemistries including nickel cadmium, nickel-metal-hydride, lithium-ion, and other chemistries currently in development.
Battery Monitoring

Battery pack voltages can range from a couple of volts in the case of portable electronics to higher voltages such as 48 V and 60 V in the case of power tools and hybrid electric vehicles. For fully electric vehicles battery stacks can be 400 V or higher, requiring fully isolated communications and power at high working voltages.

Current Sense Resistors

Types Available:
- Surface mount
- Bus bar mount

Features:
- Low TCR resistive material
- Resistances as low as 500 µΩ
- 4 Terminal Kelvin connections in some models
- AEC-Q200 qualified

Applications
- Power supplies
- Stepper motor drives
- Battery packs
- White goods
- Input Amplifiers
- Precision circuits
- Medical equipment (excluding life support)
- Printers
- Automation equipment
- Navigation equipment
- Automotive
Charging and discharging of smartphone and tablet Lithium-ion battery packs is controlled by the gas gauge IC, along with low resistance MOSFETs and current sense resistors.

For safety reasons, IC independent overcurrent and overtemperature protection may also be added to the pack. Bourns offers two technologies for pack designers; namely Multifuse® Polymer PTC technology and Mini-breaker Thermal Cutoff Device bi-metal technology.

Mini-Breakers (Miniature Resettable Thermal Cutoff Devices)

Types Available:
- Low current series (LC, NRC)
- High current series (HC, NRA, AC, SA)
- Surface Mount Series (SA)

Features:
- Overtemperature and overcurrent protection in a single device
- Resettable activation
- Wide range of temperature options: 72°C, 77°C, 82°C, 85°C and 90°C
- Low resistance
- Small & thin size for compact package design
- Optimal corrosion resistant properties
- RoHS compliant*

Applications:
Battery cell protection for:
- Notebook PCs
- Tablet PCs
- Smartphones
- Mobile Phones
- Power banks

Multifuse® Polymer PTC
Resettable Fuses

Features:
• 6 to 90 V operating voltages
• Hold currents from 10 mA to 11.0 A
• Agency certifications - UL, CSA & TÜV
• Interrupt voltages of 250 V and 600 V with surge capabilities for assisting in meeting US and international telecom requirements
• High temperature polymers available with operating temperatures between –40 °C and +125 °C
• Custom designs available upon request
• Bulk, embossed tape, and ammo pack packaging
• RoHS compliant* standard & halogen free** upon request
• Some models AEC-Q200 compliant

Types Available:
• Radial leaded through-hole
• Surface mount (0402, 0603, 0805, 1206, 1210, 1812, 2018, 2920 & 3425)
• Axial leaded battery strap
• Unencapsulated disk

Applications
• Computers
• Batteries
• Automotive
• Charging ports
• Telecommunications
• Industrial controls
• Portable electronics
• Medical products
• Point of Sale
• Game consoles and toys
• Security systems
• DC motors

(excluding critical life support)

**Bourns considers a product to be “halogen free” if (a) the Bromine (Br) content is 900 ppm or less; (b) the Chlorine (Cl) content is 900 ppm or less; and (c) the total Bromine (Br) and Chlorine (Cl) content is 1500 ppm or less.
**Introduction:**
TBU® High-Speed Protectors (HSPs) are circuit protection devices designed to protect against faults caused by short circuits, AC power cross, induction and lightning surges.

The TBU® HSPs block surges, providing a barrier to sensitive electronics and eliminating exposure to large voltages or currents during surge events up to rated limits.

**Features:**
- Extremely high-speed performance
- Blocks high voltages & currents up to rated limits
- Exceptionally low let-through energy
- Very high bandwidth, GHz compatible
- UL recognized components
- Programmable models available

**Applications**
- POTS linecards
- VoIP equipment
- ONU and ONT
- Gateways and modems
- 10/100 & Gigabit Ethernet
- VDSL interfaces
- Remote metering & surveillance
- Rail and mass transit
- Industrial automation
- Test equipment
- RS232, RS422, RS485, CANbus and LVDS
- Sensors
