

Bourns® GDT35 Series: Top 10 in Circuit Protection for Breakthrough Surge Defense

Bourns® Model GDT35 Series Earns Top 10 Recognition for Breakthrough Overvoltage Surge Protection in Electronic Products' Circuit Protection Devices Ranking

Bourns® Model GDT35 Series selected as one of the Top 10 circuit protection devices by Electronic Products editors:

- State-of-the-art surge protection performance
- Enhanced voltage limiting during fast-rising events
- Key features:
 - *High surge rating*
 - *Lower impulse breakdown*
 - *Lower capacitance*
- Advanced design enables engineers to:
 - *Select smaller and lower voltage-rated components*
 - *Helps reduce overall bill-of-materials costs*
