Introduction

Making music and sharing it is what the music industry is all about. From the soul to the stage to the studio, there are a multitude of ways to make, share and enjoy music. More than ever, it involves electronic equipment with multiple data connections, increased power demands, and improved user input controls.

Bourns is proud to be a part of this industry and has established a reputation for bringing quality, reliability and value to the business.

With a wide portfolio of products, Bourns has precision components suitable for use in audio equipment, as well as “road-worthy” components designed to withstand the abuse of repeated set-ups and tear downs associated with concert tours. From user input controls to power management to circuit protection, Bourns brings the products that enable you to do what you love, make music!

For many artists, the music gets to the audience through their fingertips. The best music requires the best controls throughout the performance. Issues such as sloppy controls, noisy output or gritty feel can all affect the integrity of the music and lights, whether in a garage or on a stage. For a high quality performance, you need high quality controls.

Bourns, Inc. has provided highly reliable faders and rotary controls to the music and lighting industries for decades. From studio quality to "road-worthy" components, Bourns has the user interface controls for the job.

As the professional audio industry evolves, Bourns continues to design and add components to its portfolio to meet industry demands. In addition to standard controls, Bourns can provide customization to meet the artist’s needs by offering various value added options such as tighter tolerances, custom feel, and custom output.

Today’s performance require clean, reliable power to make sure the show goes on. With the latest innovations in stage lighting control equipment, and instrument electronics, power requirements are everywhere, and Bourns has you covered. Bourns offers components for both linear and switch mode power supplies. On the primary and secondary side of the power supply, Bourns offering include inductors, rectifier diodes, current sense resistors, power resistors, trimming potentiometers, and power transformers.

On the portary and secondary side of the power supply, Bourns' offering include inductors, rectifier diodes, current sense resistors, power resistors, trimming potentiometers, and power transformers.

Bourns extensive line of electronic components and custom application solutions help you meet the power needs of today’s evolving market and keep the show going by providing highly reliable performance.

Applications
- Electric Guitars & Effects Pedals
- Instrument Amplifiers
- Audio & Broadcast Mixing Consoles
- Amplifiers, Digital Drums & Sound Processors
- Sound and Video Editing Equipment

Applications
- Power Supplies
- Battery Protection
- Surge Protection

Applications
- AC/DC Power Lines
- HDMI
- USB
- Firewire
- Ethernet

These connections make the equipment much more susceptible to faults from short circuits, electrostatic discharge (ESD), power surges, and the inevitable incorrect connection during set-ups. To help prevent damage, Bourns offers circuit protection products for both communication ports and power lines. With a vast array of circuit protection products from Bourns, not only can you protect your equipment from electrical surges, you can also be sure that your audience enjoys an uninterrupted performance.

A great performance requires power and data to make sure the show goes on. To keep up with the evolving musical landscape, professional audio and lighting equipment have incorporated smart features and interconnectivity. These connections make the equipment much more susceptible to faults from short circuits, electrostatic discharge (ESD), power surges, and inescapable incorrect connection during set-ups. To help prevent damage, Bourns offers circuit protection products for both communication ports and power lines. With a vast array of circuit protection products from Bourns, not only can you protect your equipment from electrical surges, you can also be sure that your audience enjoys an uninterrupted performance.
