Bourns® Model BPS125
3.3 V, ULTRA-LOW PRESSURE SENSOR

INTRODUCTION
Bourns® Precision Sensor (BPS) pressure sensors are designed for demanding applications in the industrial, medical* and consumer markets. Quality, performance and reliability are the core values of this family of environmental sensors.

MARKET SEGMENT OVERVIEW
Sensors have become the most critical component of information collection. Features such as self-diagnostics, network compatibility, small form factor and self-calibration are considered essential. “Real-time” data analytics are driving the evolution of sensors and sensor networks.

Dependable sensors for every type of pressure and environment requiring high precision with ultra-low pressure ranges are used in a myriad of applications across multiple market segments.

CUSTOM OPTIONS AVAILABLE
(Contact factory for details)
- Pressure range
- Temperature range
- Accuracy
- Port configuration
- I²C address
- Supply voltage
- Update rate (I²C only)

FEATURES
- 3.3 V supply ultra-low sensing: 250 to 500 Pa, 0.15 to 1.0 PSI (1” to 2” H2O, 1.03 to 6.89 kPa)
- Extreme sensitivity and stability: Total Error Band of 1.5 % FS over a temperature range of 0 °C to +60 °C (Six Sigma process)
- Lifetime drift: 0.5 % FS
- Media compatibility: non-corrosive dry gases
- Digital (I²C) output
- Differential and gauge options
- Active temperature compensation
- RoHS and REACH compliant**

BENEFITS
- Superior performance in ultra-low pressure sensing applications
- Design flexibility - for use in digital systems
- Compensated plug and play reduces development time
- World-class technical support
- Global supply chain

PRODUCT FIT & APPLICATIONS
These products are best suited for applications where precision is essential and customers understand the value proposition of the product in the following market segments:

Medical Devices (low/medium risk)*
- Portable oxygen generators
- Nebulizer
- CPAP equipment
- Diagnostic spirometer
- Gas chromatography equipment
- Facility ventilation pressure

Industrial
- Process control
- HVAC
- Pneumatic control
- Gas flow instrumentation
- Flow calibrators

Consumer
- Home appliances

*Bourns® products have not been designed for and are not intended for use in “lifesaving,” “life-critical” or “life-sustaining” applications nor any other applications where failure or malfunction of the Bourns® product may result in personal injury or death. BPS125 TRANSFER FUNCTION FORMULA

\[ P_{psi} = (P_{max} - P_{min}) \cdot \left( \frac{P_{counts} - 0.1 \cdot Max}{0.8 \cdot Max} \right) + P_{min} \]

Where

- \( P_{psi} \) = Measured Pressure in PSI
- \( P_{counts} \) = Pressure Counts from Sensor
- \( P_{min} \) = Minimum Pressure
- \( P_{max} \) = Maximum Pressure
- Max = 16384 = 14 Bits
