Precision Pressure Sensors
Bourns Sensors and Controls is committed to providing customers with precision environmental sensors that deliver highly stable output for demanding applications. The Bourns® Precision Sensor (BPS) portfolio of pressure sensing products is based on rugged MEMS technology. Bourns specifically designed its BPS products to meet a wide range of industrial, medical* and consumer market sensing requirements – from precision sensing at ultra-low pressures to demanding application specifications for high temperature, harsh environments.

Designers can leverage the advantages of the Model BPS110 and BPS120 pressure sensor line including extreme sensitivity and stability at ultra-low pressure ranges (less than 4-inch H₂O). All models in the BPS110 and BPS120 series pressure sensor line are temperature-compensated and calibrated for excellent performance from 0 °C to 60 °C. They also feature a TEB (Total Error Band) of 1.5 % FS, and both series are available with digital and amplified analog output.

Bourns® Model BPS130 series pressure sensors excel in harsh environments offering a wide operating temperature range (-40 °C to 150 °C), as well as harsh media** (such as water, oil and fuel) compatibility. The series’ clever sensor die design protects the sensing element from the harsh media and provides superior stability over the life of the sensor. The devices are also temperature-compensated over the entire operating range and have amplified analog outputs with a TEB (Total Error Band) of 2.5 % FS.

Using Bourns’ extensive sensors and controls product knowledge, the company is able to support product modifications on several BPS models to fit a customer’s specific application needs. Look to Bourns for the highest quality, performance and reliability in environmental sensors.

* Excluding life-critical, life-saving and life sustaining applications
**Check with factory for specific details.
### Product Portfolio

#### Bourns® Model BPS110 and BPS120 Series
**Ultra-Low Pressure**

- **Medical Devices (low/medium risk)***
  - Portable oxygen generators
  - Nebulizer
  - CPAP equipment
  - Diagnostic spirometer
  - Gas chromatography equipment
  - Facility ventilation pressure

- **Industrial**
  - Process control
  - HVAC (VAV control, clogged filter detection, transmitters, room pressure)
  - Pneumatic control
  - Gas flow instrumentation
  - Flow calibrators

- **Consumer**
  - Home appliances

#### Bourns® Model BPS130 Series
**High Temperature, Medium Pressure, Harsh Media**

- **Industrial**
  - Process control
  - HVAC (transmitters, room pressure)
  - Pneumatic control
  - Instrumentation
  - Flow calibrators

- **Transportation***
  - Fuel
  - Oil
  - EGR systems
