TBU-CA Series

TBU® HIGH-SPEED PROTECTORS

INTRODUCTION

The TBU-CA Series of Bourns® TBU® products are low capacitance single bidirectional high-speed protection components, constructed using MOSFET semiconductor technology, and designed to protect against faults caused by short circuits, AC power cross, induction and lightning surges.

The TBU® HSP, placed in the system circuit will monitor the current with the MOSFET detection circuit triggering to provide an effective barrier behind which sensitive electronics will not be exposed to large voltages or currents during surge events.

APPLICATIONS

- Voice / VDSL cards
- Protection modules and dongles
- Process control equipment
- Test and measurement equipment
- General electronics

BENEFITS

- Superior circuit protection
- Overcurrent and overvoltage protection
- Blocks surges up to rated limits
- High-speed performance
- Small SMT package

FEATURES

- Peak impulse voltage ranging from 250 V to 850 V
- Continuous A.C. RMS voltage ranging from 100 V to 425 V
- Operating temperature range -55 °C to +125 °C
- Maximum junction temperature capable of up to +125 °C
- ESD protection up to ± 2 kV (Standard: IEC 61000-4-2)
